GAIN hands-on, practical
experience on non-revenue
water reduction

LEARN from other
practitioners in the sector

BE UP TO DATE on the
latest trends in the sector

BENEFIT from regional and
global experiences from
other utilities

Non-Revenue Water reduction in water supply utilities

Program description and covered topics

This Program raises awareness of physical and commercial water losses among the participating utility companies and of activities to be undertaken to decrease them to consequently improve the operational and financial performance.

Furthermore, the program develops specific tools for diagnostic approach with the aim to increase understanding of where the losses are and how they can be tackled.

The Program has been developed in cooperation with the Technical Partner Una Consulting, who reviews existing activities and programs on non-revenue water and develops guidelines, tools, training material and manuals regarding non-revenue water providing their applicability for water utilities in Danube region.

The Program will be delivered by national or regional Hubs in local language. The duration of the Program is one year and it consists of workshops as well as hands-on exercises

at the utilities themselves with support of the Trainers. Participating utilities will pay a registration fee which will be communicated by the Hub.

Learning goals

How to establish an IWA water balance?

How to control bulk meter readings?

How to efficiently monitor Unaccounted-For-Water (UFW) analysis of Mass Balancing Zones?

How to develop a simple Non-Revenue Water management plan with a focus on key priorities and immediate actions?
