

## **Short Bio of Eng. Ilir Abdullahu**

Kosovo today.

Eng. Abdullahu graduated as Hydrotechnical Engineer in Kosovo in 1994. His first years of career started at Prishtina Regional Water Company, where for eight years he held the position of the Engineer for the Management of Technical Operations. After the following seven years, he earned the position of Chief Engineer of the company and four years later (which is practically four years ago) he was appointed Chief Executive Officer of Prishtina Regional Water Company, which is also the largest and most complex company in

After a diverse experience in designing, implementing and supervising between the office and the field, Eng. Abdullahu earned an excellent professional experience and therefore naturally attracted attention and was invited as an external associate of the University of Technology and Business in Kosovo to teach Hydraulics, water supply and sewerage. Eng. Abdullahu holds a "Doctor of Science" degree in the Faculty of Civil Engineering (FIN), Tirana themed: "Reduction of Water Losses in the Distribution Network", and has published many scientific articles into international journals.

Eng. Abdullahu has conducted a specialization in Japan for sewerage and water treatment, has been invited by the US state department to participate in the international leadership program, and more specifically, has specialized in the company of water supply in Bristol of the United Kingdom for "Control and management of water leakage from source to tertiary network / customer connection".

He is also a very active member of the Board of Directors of the Water and Wastewater Works Association of Kosova (SHUKOS).
