PUBLIC PROCUREMENT PROCEDURES FOR THE STAFF OF WATER SUPPLY AND SEWERAGE COMPANIES (6 – days)

14-15; 28-29 September and 12-13 October 2023, Tirana

Water Supply and Sewerage Companies are obliged to comply with national public procurement laws, which define the rules, standards and procedures for public procurement processes.

About SHUKALB

The Water Supply and Sewerage Association of Albania (SHUKALB), which was established in 2000, is a professional, not-for-profit Association of water supply and sewerage professionals, who wish to improve the management of the Water Supply and Sewerage Sector in Albania, making it efficient, sustainable and effective in accordance with the current laws and regulations in Albania.

This training ensures that the staff of the utilities in Albania are aware of these procedures and know how to handle procurement processes adequately. The aim of this training is to strengthen the capacities of participants in the procurement process and to improve the quality of procurement carried out by water utility companies according to the legislation in force and best practices.

This training course is especially useful for Managers, Specialists, Engineers at the commercial, technical and support services departments of water utility companies. [read more](#)

News From Our Members

Hoçisht Village in Devoll, now with a Better Water Supply Service

As a result of the national water sector aggregation reform, Korça Regional Water Supply and Sewerage Company (Korça RWSS Company) now administers the former water utilities of Devoll, Korça, Pustec, Maliq and Kolonja. The investments made by Korça RWSS Company have been divided among these 5 water utilities taken under administration. Investments are mainly being made in the most problematic areas that need improvement of the water supply infrastructure.

One of these areas is the village of Hoçisht in Devoll Municipality. The previous drinking water supply system, which included the catchment, the main water supply line from the catchment to the reservoir and the internal distribution network was deteriorated and did not ensure the normal supply in terms of quantity and quality of the service.
